

Fermions are *very* non-classical

I. Exchange Symmetry

$$|\psi(x_1, x_2)|^2 = |\psi(x_2, x_1)|^2$$

Fermions are *very* non-classical

I. Exchange Symmetry

$$|\psi(x_1, x_2)|^2 = |\psi(x_2, x_1)|^2$$

$$\psi(x_1, x_2) = +\psi(x_2, x_1) \quad \text{bosons}$$

$$\psi(x_1, x_2) = -\psi(x_2, x_1) \quad \text{fermions}$$
