

Path sampling of medically relevant biomolecular systems:

New and old tricks with OpenPathSampling

David W.H. Swenson
École Normale Supérieure de Lyon

E-CAM State-of-the-Art Workshop:
Large Scale Activated Event Simulations
Vienna, Austria; 2 October 2018

Outline

- The Problem of Rare Events
- OpenPathSampling
- Practical applications
 - Watson-Crick to Hoogsteen transition in DNA
 - K-Ras and its Q61L mutant
 - Drug unbinding from GSK3B
