Fermions are very non-classical

I. Exchange Symmetry

$$|\psi(x_1,x_2)|^2 = |\psi(x_2,x_1)|^2$$
 $\psi(x_1,x_2) = +\psi(x_2,x_1)$ bosons $\psi(x_1,x_2) = -\psi(x_2,x_1)$ fermions

Fermions are very non-classical

I. Exchange Symmetry

$$|\psi(x_1,x_2)|^2 = |\psi(x_2,x_1)|^2$$
 $\psi(x_1,x_2) = +\psi(x_2,x_1)$ bosons
 $\psi(x_1,x_2) = -\psi(x_2,x_1)$ fermions

6. Fermionic Exchange ⇒ Pauli Exclusion Principle
